

# Checklist for a Successful Window – Door Installation

All Reule Jobs Include:

## Licensing

- ☐ License # 21447 – Required by Law, assures you're dealing with a legitimate company and allows the State to mediate disputes. Non licensed individuals may limit your recovery options.
- ☐ Bonding - required by the New Mexico licensing act.

## Insurance & Certificates

- ☐ Worker compensation Insurance – Costly, but guaranties you protection against worker injuries (average claim is approaching \$ 25,000 and New Mexico leads in eye and back injuries). Personal homeowner's insurance policy in most cases will *not* cover worker injuries.
- ☐ Liability Insurance - Provides for coverage of damage to property.
- ☐ Insurance Certificates – Verifies coverage from the Insurance Company for the contractor. If a copy is presented, it should always show current coverage dates. Alternatively, we can have our Agent send you an original certificate naming you as the insured.

## Quality Window and Door Products

- ☐ Windows and Doors manufactured by a stable company, like Marvin and Semco that have been producing quality products for over 100 years.
- ☐ Products with proven performance for our harsh Southwest climate.
- ☐ Finishes that will withstand the extreme sun exposure with minimal fading and stabilized materials.
- ☐ A wide selection of shapes, styles, sizes and options to meet your needs for proper operation, ventilation and aesthetics.
- ☐ Made to order and custom sized to fit your existing openings like a glove.
- ☐ A broad selection of colors to coordinate with your exterior finishes and interior decorating.
- ☐ Stylized choices to provide an extensive selection of options, such as grids, contemporary profiles, integral window coverings, prewired alarm contacts, shatterproof glass, and factory wood finishes, etc.
- ☐ Energy efficient Low E glass for comfort and energy savings, with varying Low E coatings to provide differing heat reflection and thermal resistant characteristics, and tempering as required. The professionals at Reule will help to tailor a Low E coating to meet your needs.
- ☐ Warranties that have substance with a company that will back up their product and transferable to a new owner.

## Uncompromising Installation Practices

- ☐ Experience with the many nuances of building construction, Reule has been installing windows and doors Since 1982.
- ☐ Proper flashing techniques to insure a seal of your new windows and doors to your home or building. Reule is a Protecto Wrap flashing dealer and provides education to the trades for the proper use of flashing materials and techniques, to guarantee a 100% water proof seal and air infiltration barrier for the installation of all types of window and door products.
- ☐ Nail fin installation method for stucco homes, to insure the ultimate interface of the new window and door products to your home or building. See Trim or Fin discussion for further information. (Add Link)
- ☐ Measured and sized to provide the maximum glass exposure, with tight caulk joints for a seamless transition to the interior and exterior finishes.
- ☐ Interior drywall or plaster restored to create an uninterrupted transition to the new products.
- ☐ Stucco exterior finishes restored to create a seamless transition to the new window or door frames that makes for a new construction aesthetic. No unsightly or ugly trim pieces.
- ☐ Lead Safe practices for the installation when lead paint is identified.
- ☐ Care, protection and consideration for customer floor coverings, furniture and decorative items.

## The Reule Sun Corporation Company

- ☐ With over 60 years serving New Mexico homeowners and businesses, the Reule family has been recognized as a premier company for uncompromising construction practices and high quality products. Experienced with thousands of residential window and door installed units, along with millions of square feet of stucco refinishing, Reule will insure your project is professionally executed to the highest standards.
- ☐ GB-98 full construction license provides us the expertise to evaluate any other structural related problems associated with your installation. We have the ability to identify and remedy wood rot, incorrect construction details, or any other issues that could adversely affect the installation.
- ☐ Hourly paid employees insure you are getting skilled technicians that have the proper experience and continuing education for the detailed execution required for the installation of all of our high quality products. As is common practice in the trades, we do not pay our employees by a "piece rate" for the number of units installed. Piece rate pay creates an incentive for the installers to push as hard and fast as they can, to get through the project without consideration for the details, which almost always compromises the quality of the installation. Reule technicians are dedicated to proceed methodically and thoroughly to insure the highest and best outcome for your installation.
- ☐ As a Marvin Premier Partner and a Semco Direct Dealer, all products are purchased directly from the respective factories, leveraging our costs to the lowest possible. These savings are then passed on to our customers for the most competitive pricing available.
- ☐ Reule is a Protecto Wrap Whole House Flashing dealer with products designed specifically to seal windows and doors to the building envelope, that are also sold to other contractors and trades people. This relationship with Protecto Wrap offers us the unique opportunity to be on the cutting edge of new product offering and informed on the latest installation recommendations.

- ☐ Reule installation technicians are provided with the latest tools, supplies and company vehicles so that our installation standards are not compromised.
- ☐ Better Business Bureau member - with the highest A+ Rating and no unresolved complaints.
- ☐ Angies List Super Service Award Winner – With Reule selected as the top choice contractor for New Mexico in our trade. Solicited by independent customer reviews.
- ☐ Home Builders Association trade association member - Keeps us on the leading edge, to benefit our customers with the latest technology, building codes and installation methods.
- ☐ Graduate Remodelers Council Certification – A prestigious education certification offered by the Home Builders Association. Verified by extensive training and testing and methods to deal with existing structures.
- ☐ Green Build Professional Certification – A prestigious education certification offered by the Home Builders Association. Verified by extensive training and testing for this new age of energy efficient building practices.
- ☐ OSHA – Fall Protection Certified. Safety is a top priority for our company and workers.
- ☐ EPA – Lead-Safe Certified to insure proper renovation procedures if lead were to be present within existing painted surfaces.
- ☐ Experience with synthetic stucco finishes advanced through our relationship with Montgomery Ward for a decade in the early 1970's, as their exclusive State wide residential contractor.
- ☐ Numerous job references are available, providing an opportunity to see in person the beautiful aesthetics of a Reule installation, and to speak with our past satisfied customers.
- ☐ The Reule approach is a no compromise execution by our skilled technicians with the highest grade products, to insure a beautiful, durable installation. Our system approach and product selection is designed to provide our customers peace of mind, satisfaction and an enjoyment of their new windows and doors for many years. We thank you for considering Reule Sun Corporation for all of your window, door and stucco refinishing needs.
